

PlateGrip®

Surface Mounted -
Bearing Plate Support Ties

PlateGrip®

Product Information:

Save Time and Money!

The PlateGrip® is a fast efficient way to hold a surface mounted embedded plate in place while grouting. PlateGrip® works on all common size CMU. Easily vibrate around the studs without blowout or plate displacement. It does not interfere with reinforcing.

Additional Information:

Weight: .1 lbs

Wire Gauge: 9, 10

Stud Length: 4, 5, 6, 7, 8

Finish: Mill Galvanized (Hot Dip Galvanized and Stainless Steel also available)

Standard sizes available for 1/2" and 5/8" Diameter Studs.

Works With:

- Square cuts or core drilled holes
- Any size or thickness plate
- Continuous shear plates of any length
