

PlateGrip®

Surface Mounted – Bearing Plate Supports

Simple, Fast, Strong!

PRODUCT INFORMATION:

The PlateGrip is a fast, efficient way to hold an embedded plate in place. PlateGrip works on all common sized CMU. You can easily vibrate around the studs without blowout or plate displacement, and it does not interfere with reinforcing.

Weight: .1 lbs

Wire Gauge: 9, 10

Stud Length: 4, 5, 6, 7, 8

Finish: Mill Galvanized (Hot Dip Galvanized and Stainless Steel also available)

Standard sizes available for 1/2" and 5/8" Diameter Studs

WORKS WITH:

- Square cuts or core drilled holes
- Any size or thickness plate
- Continuous shear plates of any length

ADVANTAGES:

- Cost effective, Saves time
- Eliminates costly deficiencies
- Works with jamb channels and jamb angle frames
